

Curriculum Bachelor of Science Leisure Studies

What we educate for:

- We educate our students to become future-proof, responsible and impactful leisure professionals and academics.
- We educate our students to operate at the crossroads of fundamental research and applied research.
- We enable students to be in control of their personal, professional, and academic development.
- We educate students to be able to navigate and solve complex (leisure) problems in today's (digital) network society.
- We educate our students according to the theory of significant learning experiences
